Hahaha There will be plenty of time for sleep later. I think I'm young enough to bounce back :)

I'm really enjoying working in the REOC. There are a lot of great people down here and I've learned so much. This is really great experience. I'd definitely be willing to work on other responses in the future.

Now, Jessica....we need you to get some sleep and exercise •

I REALLY appreciate your outstanding efforts but I don't want you to end the response as a middle aged woman (humor intended..burnout concer also intended).
